

PHASE IV DEBRIS REMOVAL SURVEY
Preliminary Environmental Unit Review

Waterway: Lake Maurepas, 7106

NOAA reviewer: Jessica White *JW*

Date: 5/5/2008

Checklist of Environmental Factors – Assess the potential for impacts to the following resources/areas and coordinate as necessary:

- ☒ Habitat/environmental sensitivity – *Avoid shoreline and birds nesting in tree stands,*
- ☐ Threatened/endangered species
- ☐ Cultural/historical resources
- ☐ Oyster habitat
- ☐ State/federal/tribal lands
- ☐ Scenic waterway

Summary and Conclusions of Environmental Review:

Habitat/environmental sensitivity: Lake is surrounded by forested wetland/bottom land hardwood and scrub/shrub wetland. Limit activities to open water to avoid shoreline impacts. A rare raptor and other birds (herons, egrets) may be present along the perimeter of the lake nesting in the forested areas – avoid impacts to the birds by limiting activities to open water.

Threatened/endangered species: No threatened or endangered species are present in the lake.

Cultural/historical resources: No known resources at this time.

Oyster habitat: None present in lake.

State/federal/tribal lands: None appear in the survey area.

Scenic waterway: Not a scenic waterway.
